

PANEL FLEXI

The Panel Flexi is added to the standard high 2,050 mm ST20 mesh panels to make the existing panel wider. It can infill a gap between 50-199 mm, and creates an aesthetic looking solution which is easy to install.

The Panel Flexi can be used instead of the End profile, where the idea is that you order a wider panel that can be cut on-site. With Panel Flexi, you order a smaller panel and add on the Panel Flexi so there is no need to cut any panels on site.

FACTS

ART. NO	COMPONENTS	
20006001	Panel Flexi ST20	2050x25-199

Finish on panels, posts and powder coated accessories has the last figure variants in **ART. NO.**
